Contenta and Contenta S1000D v5.12.2 Released.

13 September 2024

Contenta and Contenta S1000D v5.12.2

RWS is pleased to announce the release of Contenta and Contenta S1000D 5.12.2.

This release is a continuation of our work to fix reported issues and improve performance and usability to meet the needs of our customers. We also address the latest security vulnerabilities, understanding that protecting data of significant value to businesses and national interests is of vital importance.

Fixes and enhancements have been made to admin tools, Arbortext editor tools, S1000D upload handling of very large DMs as well as search and the Web UI.

Please find more details about the 5.12.2 release on our product documentation portal at Contenta 5.12 and Contenta S1000D 5.12. Navigate to "Release Notes" and "Platform Requirements" within each product to see the latest changes and evolving platform support.

Please find the current support status for prior releases at Contenta Publishing Suite Product Version Release Status. We strongly encourage you to upgrade to the latest version to benefit from the latest fixes, feature enhancements, performance improvements, and security updates.

To request the most recent software release or ask a question about this announcement, please open a support ticket at RWS Customer Support Portal.
