

XPP 9.6 Available Now!

September 22, 2021

Key themes for XPP 9.6 are Security and IT-Friendly.

We have upgraded specific platform support, for example, with this release all MS Windows supported platforms are 64-bit eliminating the previous requirement for 32-bit Redistributable Packages. We have also resolved security risks by upgrading specific third party OEM components, for example, Perl. The details are provided in the release notes and platform requirement documents.

In addition, for those who did not participate in the XPP 9.5 controlled release, this release will be your first opportunity to use the following new features and feature enhancements.

- EDGAR HTML output directly from XPP for US SEC financial report filing!
- HTML Output directly from XPP!
- XPP Compare updates including significant CALS table enhancements and the ability to perform character by character comparisons.
- Divxml enhancements for the styling and placement of edit traces, underlines, and tabular ruling
- Tabular composition enhancements enabling more sophisticated post-processing
- Direct to PDF enhancements for compression and version compatibility setting
- Users can now input Chinese, Japanese, and Korean characters in Form Filler fields

To initiate the ordering and delivery of this version release, please open a support ticket through the RWS Customer Support Web Portal.

As with any new release we ask that you review the Platform Requirements, Release Notes and Fixed Issues Report prior to installing the release. These documents, along with the complete XPP Documentation set is available here: <https://docs.rws.com/XPP9.6>

Effective with the XPP 9.6 version, the release status will be:

- Full Support (previously called Active and Mature): XPP 9.6, XPP 9.4
- Retired: XPP 9.5 Controlled Release; XPP 9.3 and previous

Customers running on retired releases should consider upgrading soon as although we may still be able to provide technical support, we are not able to provide Hot Fixes for a retired version release.

Should you have any questions concerning this announcement, please do not hesitate to contact RWS Customer Support.
