Contenta, Contenta S1000D & LiveContent S1000D v5.11 versions released
New LiveContent Mobile option available now!

Introducing LiveContent S1000D Mobile for disconnected/offline use

This new purchasable option is available with LiveContent S1000D v5.11 for publishing and viewing Mobile IETMs on iPad tablets using the new LiveContent S1000D Mobile native app. The new Mobile app provides a user experience for interacting with the IETM on an iPad that is compatible with the IETM UX available with the Safari browser today. This differentiating capability is essential for those who need to perform their work disconnected from any network.

Contenta S1000D and the LiveContent S1000D Publishing Server have been updated to support this new Mobile option.

Contenta, Contenta S1000D and LiveContent S1000D v5.11

Security has been the primary theme across all the product versions being released in the second half of this calendar year. Each of these product releases include component upgrades for security along with a platform refresh. Reference the Release Notes and Platform Requirements for further information.

The current release status is kept up-to-date here: Current Product Version Release Status

As always, we encourage you to upgrade to the latest version release at your earliest convenience. To initiate the ordering and delivery of any software upgrade, please open a support ticket through the RWS Customer Support Web Portal.

If you have any questions concerning this announcement, please contact Customer Support.
