

LiveContent v6.1 Released!

07 May 2025

We are pleased to announce that LiveContent 6.1 is now available for download upon request from [Customer Support](#).

LiveContent v6.1 includes security updates and expanded platform support. Newly added features include Client Certificate Authentication and improved Large Table handling. Publishing IETPs for the iPad tablet mobile app is now available. Please visit LiveContent Release Notes at the link referenced below for complete information on new features.

We understand security is a top priority for our customers and it remains a constant challenge to stay ahead of cyber threats. LiveContent v6.1 includes enhancements to key security frameworks upon which the product is built.

LiveContent 6.1 now supports Linux, ensuring a consistent experience across the most widely used operating systems. Please refer to Platform Requirements for the LiveContent product at the [Documentation Center](#) for a full list of supported operating systems and 3rd party software.

You may find the current release status here: [Contenta Publishing Suite Product Version Release Status](#). Visit the [Documentation Center](#) to see LiveContent Release Notes describing what's new in version 6.1.

To initiate the ordering and delivery of RWS software products, please open a support ticket through the [RWS Customer Support Web Portal](#).

If you have any questions concerning this announcement, please contact [Customer Support](#).
