MultiTrans 2019 Patch 6.1.19057.1 – 6.1.19128.3

New Features

1. (47288) Project Managers have the option to not display the Quality Assessment forms to customers if the delivery is accepted.
2. (47744) The default memory allocation for MultiTrans Flow has been increased.
3. (47560) The icons used in the Customer Portal have been updated for better usability.
4. (3914) A column with checkboxes has been added to the Project Manager Portal dashboard table for easier selection of multiple projects.
5. (47951) The system requirements for the MultiTrans TMS have been updated to require IIS 7 or higher.

Program Updates

1. (47710, 47716, 47728) When editing projects from the Customer Portal, new reference or confidential documents can be added.
2. (46765) The project progress is displayed correctly in the Customer Portal.
3. (46734) All possible statuses are displayed in the Projects by Status list in the Customer Portal.
4. (47218) Newly delivered files do not appear as *Accepted without acceptability check* in the Customer Portal.
5. (46814) The project advanced search filters in the Customer Portal return the expected results.
6. (47605) When moving from one project to another in the Customer Portal, the correct document names are displayed.
7. (47513) Invoice amounts are properly formatted on the Customer Portal dashboard.
8. (47401) All source files in a project can be downloaded together from the Customer Portal.
9. (3693) Alphabetic listing of users in the Customer Portal is not affected by capitalization.
10. (46916) The Also Deliver To value can be edited for existing projects from the Customer Portal.
11. (47699) Upon submission of a new project from the Customer Portal, the new project is selected on the Project page.
12. (47350, 47878, 47879) Quote Required and Send Back Original Doc can be selected easily from the Project Creation Form.
13. (47413) The list of workflows is displayed without additional spaces within the Customer Portal Services List.
14. (47599) Files uploaded to projects from the Customer Portal can be flagged as reference.
15. (47700) The status of accepted deliveries can be viewed from the Customer Portal.
16. (47441) Deliveries can either be accepted or corrected files can be uploaded from the Customer Portal.
17. (46818) Customers are redirected to the appropriate project when clicking a notification link from an email while not logged into MultiTrans.
18. (47345) SDL's Enterprise Translation Server (ETS) will return results for all supported languages.

19. (47432, 47803) Accented characters display correctly in the French and Spanish user interfaces.
20. (47229) The Web Editor will jump to the correct location when the "go to" segment number is not in the current page.
21. (46573) The current page number in the Web Editor is correct after changing the page size.
22. (4399) When pasting into a Web Editor cell with the spellchecker enabled, the cursor retains its position.
23. (4031, 4044) The Web Editor and XLIFF Editor consider text directionality in the XML file preview.
24. (46864) Users can log back into the Web Editor after reloading the site.
25. (47035) The Add to Team Server icon is not available in the Web Editor unless an Output TM has been selected.
26. (4497, 18052, 46516, 46517) Text colour indicating match source is retained in the Web Editor following edits and replacements.
27. (4352) Additional safety checks have been added to retain the integrity of documents with improperly placed tags.
28. (47504) Segments with superscript characters can be edited in the XLIFF Editor.
29. (47537) Word documents with empty lists can be edited and previewed in the XLIFF Editor.
30. (4913) Text with hyperlinks is extracted when paragraphs are segmented.
31. (46906, 47616) Text in workbook sheets embedded in PowerPoint slides is not duplicated on extraction. Some improper embedding errors will automatically be corrected on text extraction.
32. (46559) Lists of customers or providers can be imported from CSV or XML formats.
33. (4042) The text direction is set according to the language parameters when SRT files are exported from XLIFF format.
34. (47512) System review settings are considered when project-level review settings are not specified.
35. (47451) The TMS Settings button is properly labelled in the Project Manager Portal.
36. (46880, 47707) When clicking the Active Projects, Unassigned Projects or Non-billed Projects from the top of the Project Manager Portal dashboard, the list of projects is filtered accordingly.
37. (46768, 47704, 47758) Project Managers and Administrators default to the correct view of the Project Manager Portal dashboard automatically.
38. (3887, 47703) Project Managers cannot revert to older versions of the Project Manager Portal dashboard.
39. (47283) The CSS version is set to 3.0 automatically when upgrading to MultiTrans 2019 SP1.
40. (47061) The tooltips on the Project Manager Portal Project List page display correctly.
41. (46839) The Project Manager Portal dashboard launches without requiring a refresh.
42. (4698, 4700) Background errors appearing in logs have been cleaned up.
43. (3657) Project Managers can right-click the search icon on the dashboard and open the search in a new tab.
