

# Trados® Live Team

## Team working made easy

### What is Trados® Live Team?

Trados Live Team is our next-generation cloud solution for speeding up translation project management and delivery – ensuring translation quality at scale.

It integrates seamlessly with Trados Studio® – our market-leading desktop CAT tool – to provide you with a complete localization and collaboration platform that allows your teams to work and collaborate together.

It's built on RWS® Language Cloud, a resilient native cloud platform based on the principles of 'security by design'.

### Why work in the cloud?

Put simply it makes everything easier.

There's no infrastructure to deploy. No software to install. No complicated setup. No upgrades. All of which means you can get up and running with the technology straight away.

The cloud enables hybrid working – so you and your teams can work anywhere, any time – and it gives you access to the latest features as and when they are released. It's scalable too, so as your team grows you can add users easily.

And to top it off, without the costs of having to manage and maintain the IT infrastructure it's also more cost effective.

### Is it secure?

Trados Live Team has numerous security processes and controls to help us comply with the latest standards, regulations and certifications, and to help ensure your information stays secure and confidential.

It is hosted in Germany, known for its strict data protection regulations – plus it is the only intelligent translation solution to be awarded ISO/IEC 27001:2005 certification.

Moreover, with Trados Live Team you can control who has the right to work on your projects with time-limited access to which project files and resources they can see and work on.

### Why choose Trados Live Team?

- Secure, cloud-based project management environment
- Seamless integration with Trados Studio
- Centralized projects, translation memories and terminology
- Easy project creation
- Translate online from any device
- Intelligent dashboard and notifications
- Scalable to your business needs
