MultiTrans 7 Patch 7.0.19302.3 – 7.0.19350.1

New Features

1. (50717) The number of pages is calculated within the TMS following a MultiTrans Analysis machine task or a project Global Analysis. This number is based on the **Words per page** field in **Settings > MultiTrans Settings > Analysis** which can be overwritten at the project template, project and document level. The number of pages is always rounded upwards to the nearest half page.
2. (49746) Users and profiles removed through the Administration Console are tracked in the **Audit** node.
3. (50709) All password changes from any MultiTrans application are tracked in the Administration Console **Audit** node.
4. (48131) Expired passwords are tracked in the Administration Console **Audit** node as soon as a user attempts to log in.
5. (50566, 50567) SDL Machine Translation connectors have been rebranded as **SDL Machine Translation Cloud** (formerly BeGlobal) and **SDL Machine Translation Edge** (formerly ETS).
6. (50728) The **Audit** node of the Administration Console is available in French, German and Dutch.
7. (49882) **Weighted Hours** and **Weighted Words** have been added to the **Report Workdone by Month, Provider and Service** report where applicable.

Program Updates

1. (51647) Providers can retrieve the necessary documents from the previous workflow step.
2. (51283) Bell alerts in the Project Manager Portal display for PM CC users.
3. (51598) The **New Project** icon remains visible when the Project Manager Portal dashboard is resized.
4. (51409) Delays when assigning a provider to a workflow task have been corrected.
5. (48113) Delays when loading a large list of project groups in the Project Manager Portal have been corrected.
6. (51238) A potential vulnerability found in the MultiTrans TMS login page has been eliminated. A hotfix for this issue was made available 11/13/2019.
7. (51185) Administrators and project managers can define new services without a **Multiplier**, which is then automatically set to **1**.
8. (50801) Pre-translation results from **SDL Machine Translation Cloud** appear in the desktop XLIFF Editor.
9. (51333) The email notification to providers when tasks are due is sent when the provider was assigned directly in the workflow template.
10. (51087) The date filters in the **Audit** node of the Administration Console reflect the UTC time zone.
11. (51018) The option **User must reset password on next login** is not set automatically on user creation through the Administration Console.

12. (51092) Project managers are correctly logged as making changes to customer contact information in the [Audit](#) node of the Administration Console.
13. (50856) Internal opening and closing of sessions, not triggered by users, do not appear in the audit logs.
14. (51017) The [Audit](#) node of the Administration Console resizes correctly.
15. (50864) [Settings > Enterprise Administration > Available Task List Columns](#) displays correctly in French.
16. (48875) Customer contact information can be edited using the French user interface.
17. (51383) The [Instructions](#) tab in the project details has a header.
18. (51217) The description text in the Study Budget Estimate Tool (SBET) notes that the [Study Name](#) is mandatory.
19. (51170) The SBET sample files are installed correctly when applying a patch rather than a full installation.
20. (49657) Errors are handled more gracefully in the SBET when formulas include division by 0, mismatched parentheses, missing rates, or no word count or page count for a document type.
21. (51252) Word documents with embedded charts can be exported following translation. A hotfix for this issue was made available 12/11/2019.
22. (51571, 51704) Word documents containing hidden text with various segments and tags can be analyzed and translated. A hotfix for this issue was made available 12/11/2019.
23. (51644) Excel files with headers containing ampersands (&) can be exported following translation.
24. (46455) Word documents containing bookmarks can be analyzed and translated.
25. (50599) Excel documents can be analyzed and translated when the option [Translate Worksheet Names](#) is not selected and [Skip Hidden Text](#) is selected.
26. (51234) Non-textual segment modifications are tracked in the XLIFF Editor and the Web Editor, viewable using [Tracked Changes](#) or [Segment History](#).
27. (50810, 51410) Modified translation units can be added to the Team Server following a search and replace or replace all.
28. (51505, 51286) The prompt to replace identical text does not appear after clicking [Filters](#) in the XLIFF Editor.
29. (51287) Any number of filters can be selected and deselected in the XLIFF Editor regardless of the options selected for replacing identical text.
30. (50775, 50995) The text coloring of tracked changes is accurate.
31. (6409) The [Term Search](#) link to [UNTerm](#) has been updated.
32. (50008) The workflow step and provider displays accurately in the Customer Portal.
33. (51473) Post-delivery reviews are available in new custom Project Creation Forms (PCFs).
34. (51583) [Customer Review – Web Editor](#) task notifications are sent.
35. (51615) [Customer Review](#) tasks can only be viewed by project managers once completed.
36. (51152) The [Waiting for approval](#) tooltip has been corrected in the Customer Portal.

About SDL

SDL (LSE: SDL) is the global innovator in language translation technology, services and content management. For more than 20 years, SDL has transformed business results by enabling nuanced digital experiences with customers across the globe so they can create personalized connections anywhere and on any device.
