MultiTrans 7 Patch 7.0.20051.1 – 7.0.20084.2

New Features

1. (50664) Users with **Admin** profiles can be excluded from the concurrent login count, allowing multiple machine tasks to be run simultaneously while restricting non-administrative users.
2. (52522) Customer contacts, project managers and providers can see the time and date of their last login from their respective dashboards.
3. (52384) Project-level access rights can be set, overriding provider access rights for that particular project.
4. (52357) Project numbers contain leading 0's (001, 010, etc.) for ease of searching and sorting.
5. (52999) Project managers can download all assigned documents or all unassigned documents in a project together as one zip file from the **Overview** page.
6. (51875) Document-level metadata can be imported through the Auto-Align Scheduler and the TextBase Builder API.
7. (51129) The project **Title** is available as a column option in the Project Manager Portal dashboard and project lists.
8. (52446) The Project Manager is available as a search criterion in both the Advanced Search and when creating project lists from the Project Manager Portal.
9. (52526) Links to support have been updated to point to <https://gateway.sdl.com>.

Program Updates

10. (7130) Customer contacts cannot view internal project comments.
11. (53182) Providers can be created using the French TMS interface.
12. (47674) The target TextBase for updates is applied to projects created using templates.
13. (49844) The target cell of the XLIFF Editor resizes automatically when the translated text is larger than the source text.
14. (50568) Formatting added through the XLIFF Editor is preserved when clicking through target segments.
15. (52354) The CSV exports retrieve the correct number of invoices.
16. (52433, 53027) Several obsolete options have been removed from the user interfaces.
17. (48375) Pressing F3 twice in the Web Editor no longer deletes text.
18. (52310) Text from embedded *.doc files (pre-Office 2007) within PowerPoint files is extracted for translation.
19. (50842) Whitespace trimmed during segmentation is restored correctly.
20. (51851) Scientific notation and #N/A are recognized as numbers and symbols.
21. (52828) Standard and weighted units are updated in a project when target languages are removed from that project.
22. (47436) The project link is correct in the email notification to project managers on completion of a customer review task.
23. (53458) The support portal opens on a new tab when selected from the Provider Portal.

24. (53069) Users can still access the MultiTrans online help when prompted to change their password.
25. (52992) New providers must be given a role upon creation.
26. (52860) Customer contacts cannot be duplicated via the CSV import.
27. (53478) No errors are added to the logs when customer contacts are created.
28. (53000, 53317) The message informing a user they must change their password displays in Internet Explorer prior to redirecting the user to the password change window, where the password criteria are listed.
29. (53030) The **Cancel** button is inactive during a mandatory password change.
30. (49591) Files sent for corrections in the post-delivery review are no longer available in the Customer Portal.
31. (51747) Post-delivery review cycles are not restarted when closed projects are edited.
32. (53285) Weighted units are displayed with the unit type.

About SDL

SDL (LSE: SDL) is the global innovator in language translation technology, services and content management. For more than 20 years, SDL has transformed business results by enabling nuanced digital experiences with customers across the globe so they can create personalized connections anywhere and on any device.
