MultiTrans 7 Patch 7.0.20248.2 – 7.0. 20283.3

New Features

1. (58751) Users can directly access a particular language Flow login page using the following links:
   - English: http://FLOW_URL/login.jsp?forcedLang=en
   - French: http://FLOW_URL/login.jsp?forcedLang=fr
   - Spanish: http://FLOW_URL/login.jsp?forcedLang=es
   - German: http://FLOW_URL/login.jsp?forcedLang=de
2. (59433) The Rates field has been added to the Project Template, Service Template and Document Template CSV Exports.
3. (58790) An integration framework is in place for SDL Helix.
4. (58792) The following parameters have been added to the REST API getProjectDetails response:
   - serverURL, containing the server URL from which the response was generated.
   - projectLink, available per project within the response, containing a link from which a Project Manager user who is logged into Flow can open the referenced project directly.
   - lowerBand, added within the units container, in which the low end of the unit matching band is included.
   - instructions, available per project within the response, containing the customer instructions only.
   - sourceDocumentId, added within each target document container, relating back to the corresponding source document.
   - alsoDeliverTo, available per project within the response, containing the Also Deliver To users for that project.
   - otherCc, available per project within the response, containing the Other CC users for that project.
5. (58793) The following parameters have been added to the REST API getTasks response:
   - serverURL, containing the server URL from which the response was generated.
   - projectLink, available per project within the response, containing a link from which a Provider user who is logged into Flow can open the referenced task directly.
6. When Convert word count to hours is active in Settings > System Parameters > Worksheet:
   - A new option is available to show the hours left to assign for each provider in the Time Line view of the provider's schedule.
   - Providers missing capacity values can be selected.
   - Project Managers see in the workflow display if default capacity values are missing for a particular service.
7. A variety of underlying components updated, and a significant number of potential vulnerabilities addressed.

Program Updates

8. (59640) Projects can be submitted through the Customer Portal regardless of the selected date format of the customer contact.

9. (53465) Same-day projects submitted through the Customer Portal must have a future hour.
10. (58591) Projects that surpass the configured size limit for Direct Text Translation cannot be submitted through the Customer Portal.
11. (59734) The Audit Trail – Timeline file generates correctly.
12. (59762) The Audit Trail – Document downloads file contains the download information.
13. (54843) The <%Units%> and <%Weighted Units%> elements in the notification templates are formatted correctly in the sent email.
14. (47327) The delivery link is correct when Project Managers deliver final documents to the customer via the envelope icon and select Send as link to Project Creation Form (PCF).
15. (58603) The CSV Document Template exports the Document Total Word Count correctly.
16. (55451) The access right to download workflow documents overrides project level or system level Web Editor - Can download option.
17. (58600) Project-level access rights override provider access rights for previewing and downloading documents.
18. (55263) Placeholders (??) are inserted in the preview and export from the XLIFF Editor to indicate missing segments when the proper option is enabled.
19. (59817) Priority options can be deleted from the Settings.
20. (54939) Provider priority colours can be selected in the Schedule module via the French user interface.
21. (58677) The productivity set for a particular unit must be at least 0.01.
22. (55270) Workflows with reassigned tasks can be deleted.
23. (58520) Source Japanese terms display correctly in the XLIFF Editor Translation Agent.
24. (58818) Double quotes do not display as " in the Web Editor.
25. Some localization issues corrected.
26. A variety of WCAG accessibility issues corrected, primarily in the Customer Portal.
27. (59556) MultiTrans Flow can be patched when not installed in the default directory.
