get more done,
keeping quality**

Before and after...

The screenshot displays the Tridion Sites interface in its 'Before' state. The left sidebar shows the 'Content Management' tree with 'Products' selected. The main content area shows the 'Products' list with three items: 'LightSolar CI Offering', 'LightSolar CII Offering', and 'LightSolar RI Offering'. The 'LightSolar RI Offering' is selected, and its details are shown on the right. The details include a description of the rooftop systems and a media gallery with a photo of solar panels.

LightSolar RI Offering

rooftop systems. LightSolar RI panels can generate high amounts of energy even when space is limited. As one of the industry's most trusted panels, the LightSolar module is a popular option for residential customers because of its reliability and compatibility with all major balance of system components and most module-level power electronics.

Media

New workflow activities tab to stay on top of things

Activities list on Experience Space

Be more efficient with the 'new' activities view

- ✓ View all workflow activities (process definition, the item and publication you're working on, its status, who it's assigned to, and when it was assigned)
- ✓ Filter, sort and export this list
- ✓ Select an activity to open a side bar with more in-depth information
- ✓ Users receive notifications when activities are assigned to them

Use Experience Space as suits you best

Batch upload

- ✓ Upload multiple files at once
- ✓ Once uploaded, they're automatically converted to multimedia components
- ✓ WebDAV protocol has been deprecated

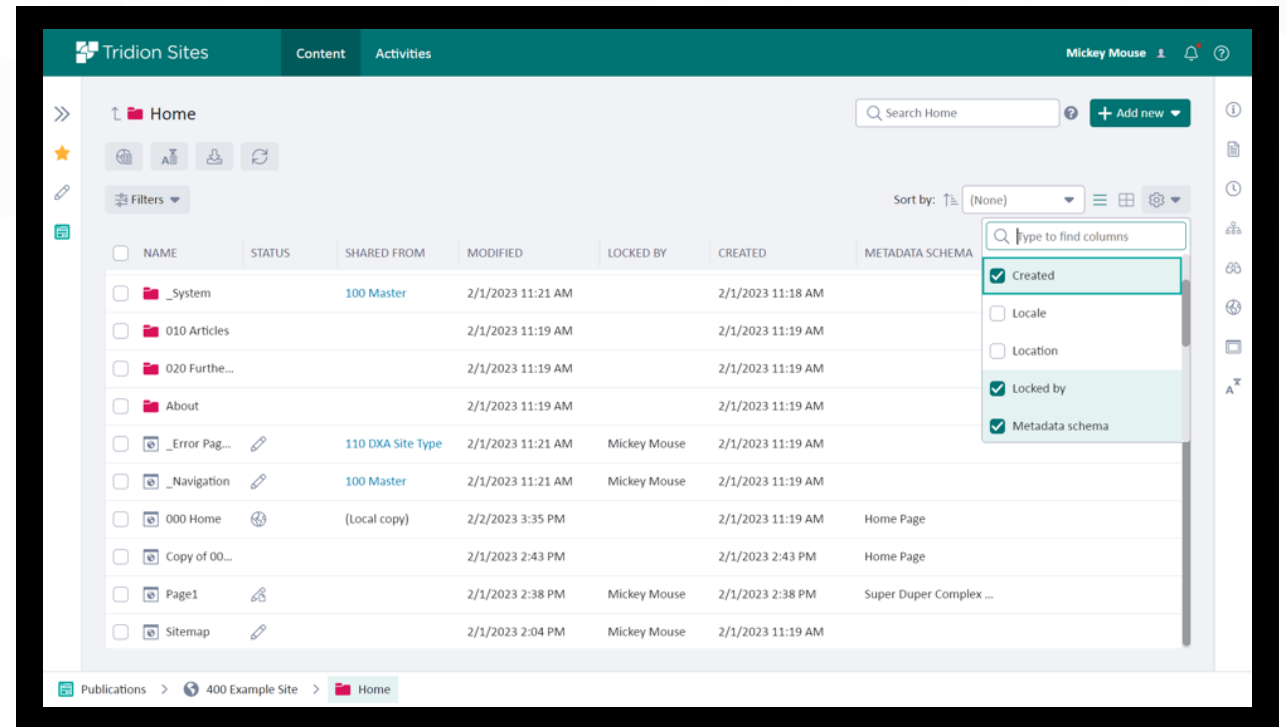

Thumbnail and list improvements

- ✓ View content as thumbnails in the main Content Explorer list
- ✓ More options to filter and sort lists

Configurable lists

- ✓ Choose & arrange the columns to view, including columns based on your own custom data
- ✓ Your new view is saved

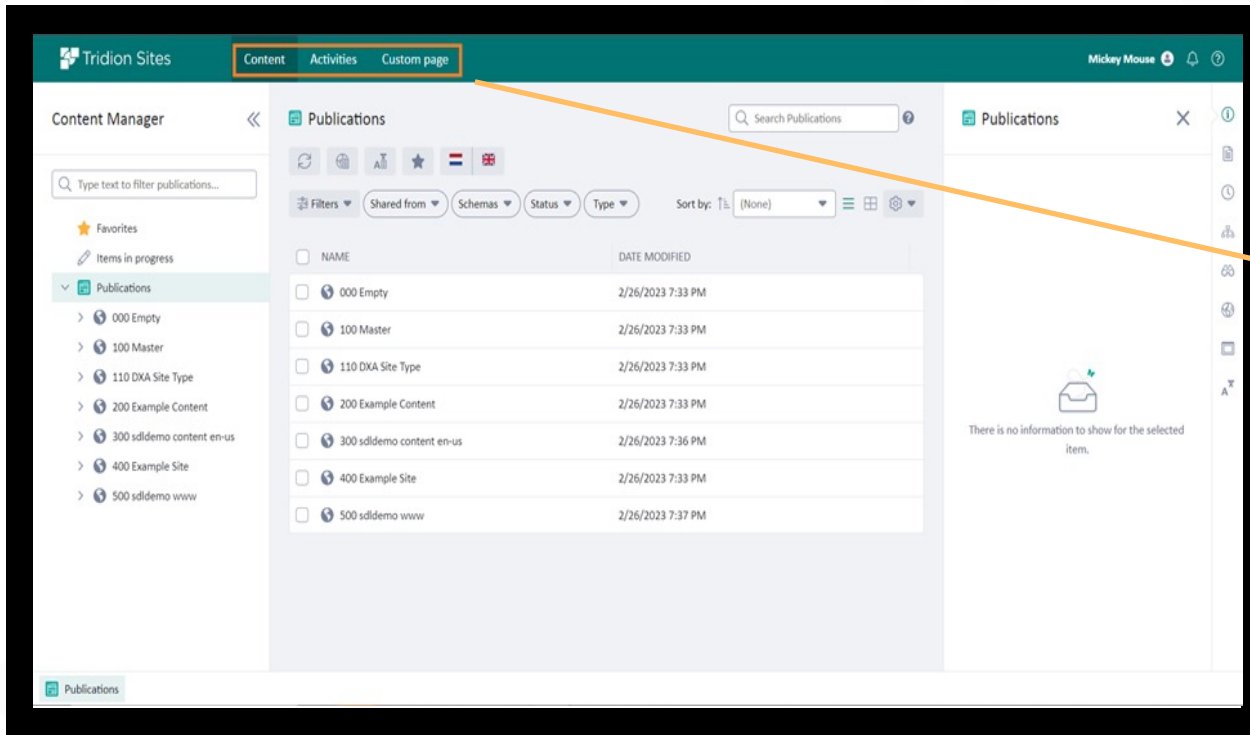

Configuring list in Content Explorer

UI extensions #1

Add

- ✓ Items in the primary navigation (e.g. button for custom dashboard)
- ✓ Custom data to show in columns in Content Explorer lists

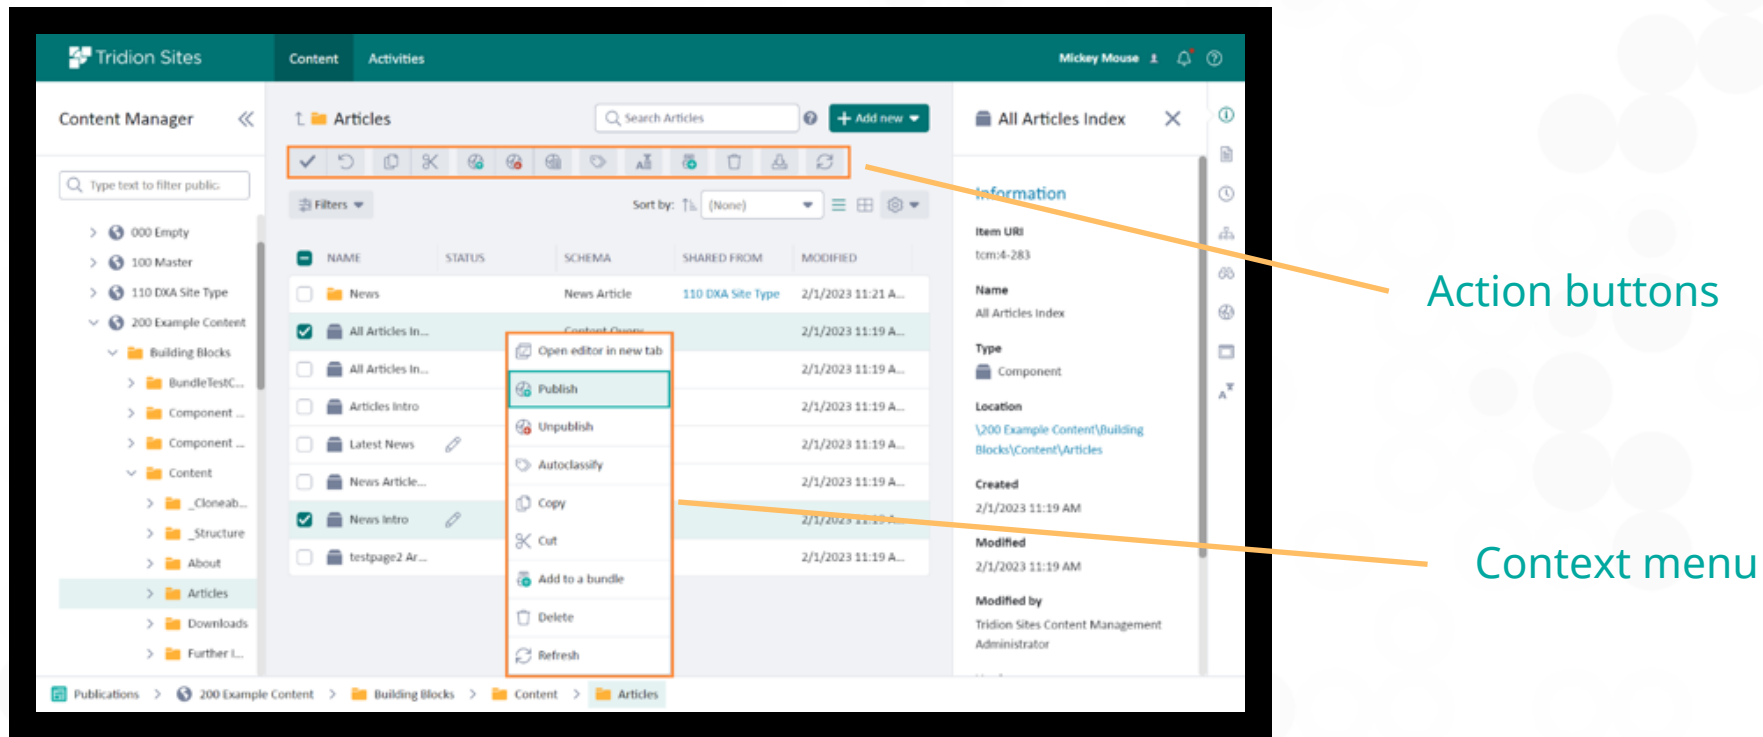

Custom primary navigation tabs

UI extensions #2

Add

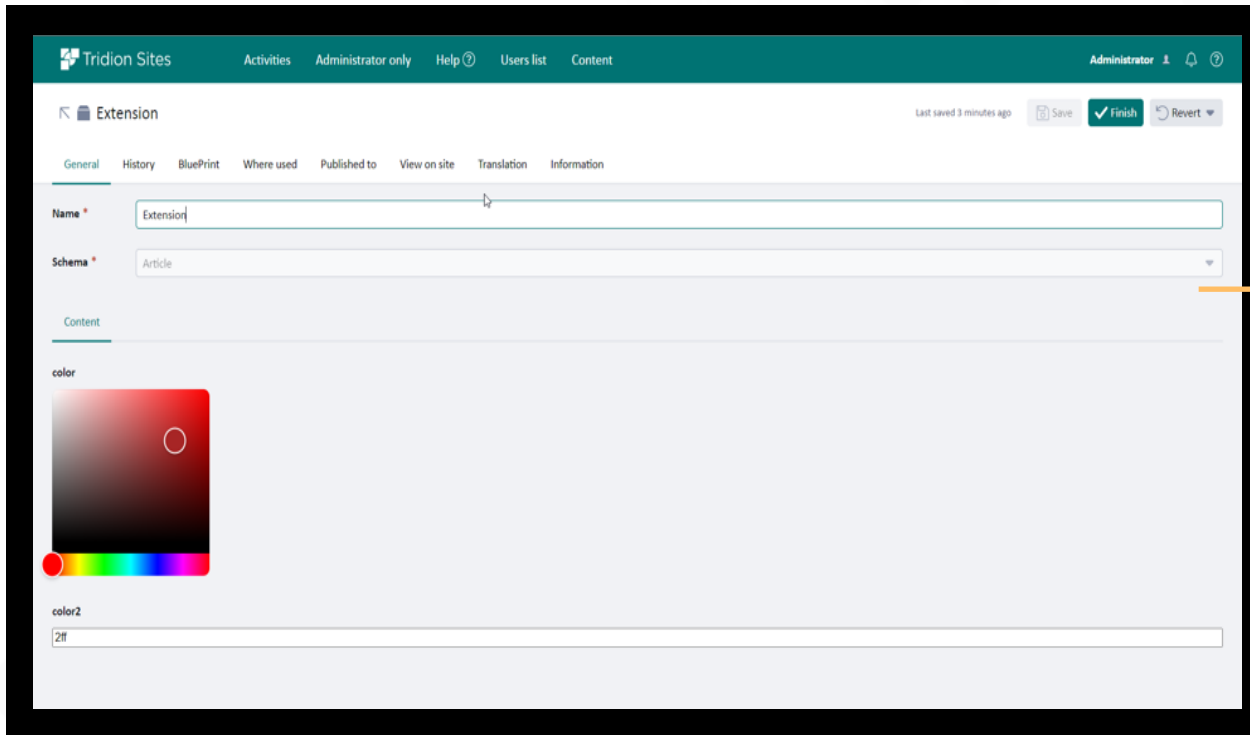

- ✓ Custom action buttons
- ✓ Custom context menu items

UI extensions #3

Add

- ✓ Rich text editor extensibility
- ✓ Customizable fields (not just custom URLs)

The screenshot displays the 'Extension' configuration page in Tridion Sites. The page has a teal header with navigation links: Activities, Administrator only, Help, Users list, and Content. The user is logged in as 'Administrator'. The main content area is titled 'Extension' and includes tabs for General, History, Blueprint, Where used, Published to, View on site, Translation, and Information. The 'General' tab is active, showing a form with the following fields:

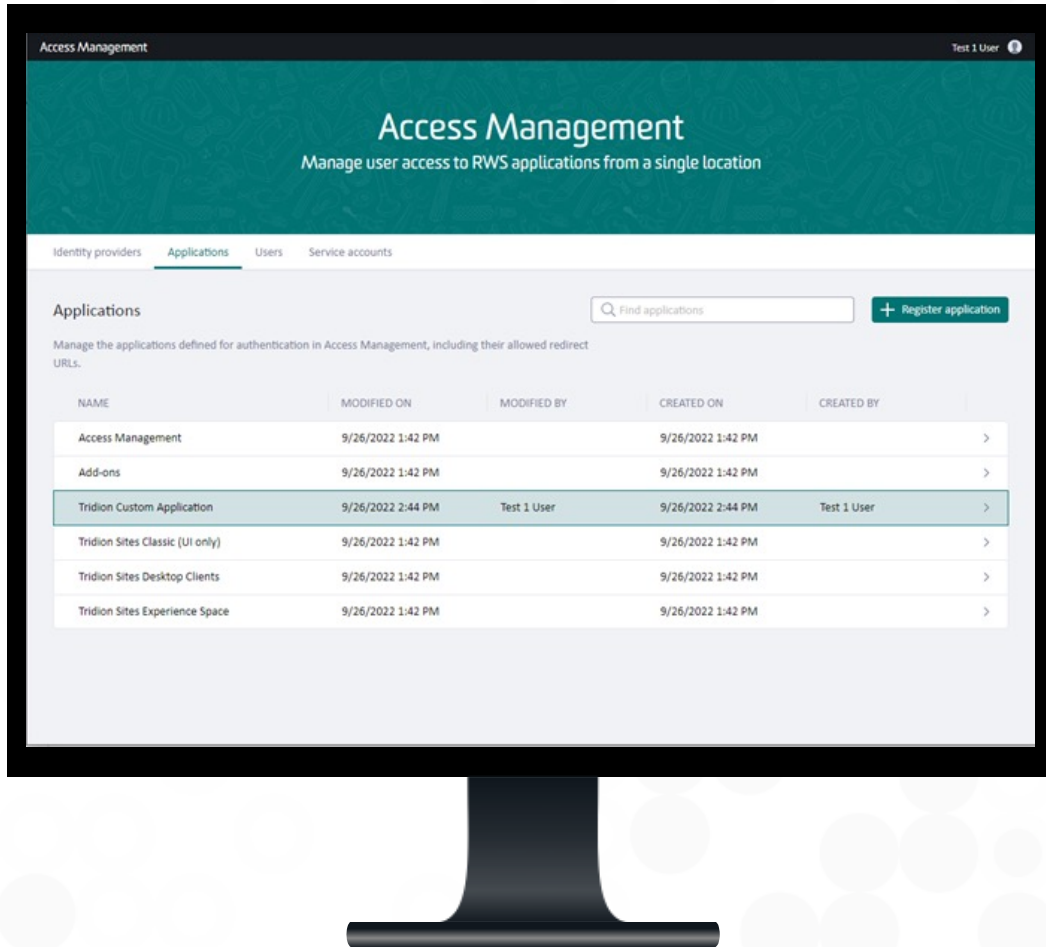

- Name ***: A text input field containing the value 'Extension'.
- Schema ***: A dropdown menu with 'Article' selected.
- Content**: A section containing two fields:
 - color**: A color picker showing a red-to-black gradient.
 - color2**: A text input field containing the value '2ff'.

Custom field, with UI tailored to data type

**Gain full control
over your
applications and
publications**

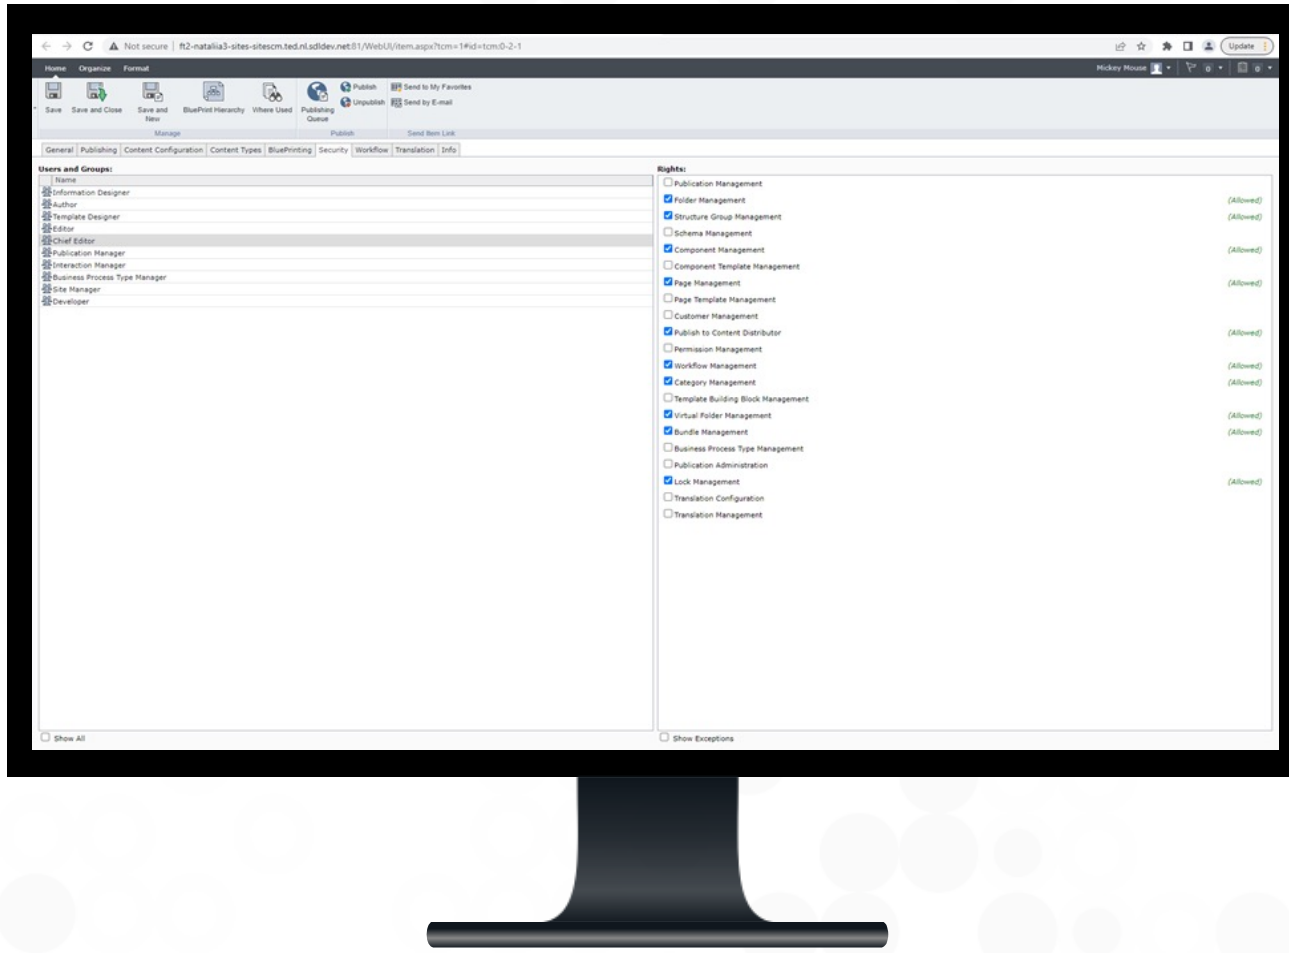

A single window to manage access to all applications

Optimize access management

- ✓ Register and manage custom applications and their service accounts from the Access Management window
- ✓ It allows your users to access any dashboard or extension with a single sign on (SSO) authentication from Tridion Sites
- ✓ Application developers have control over which users can access the custom application, and over which users have authorization for specific actions

Improve control over publishing and add-ons

Control access and track changes

- ✓ In previous versions, only admins could hold 'Lock Management' rights (enabling them to check in or check out items locked by other users)
- ✓ In Tridion 10, admins can also assign Lock Management rights to any user or user group of their choosing
- ✓ Store auditing data, when an add-on or configuration is uploaded and/or updated
- ✓ Enable or disable an add-on

Tridion Sites 10 covers the top 10 popular customer demands

Demo

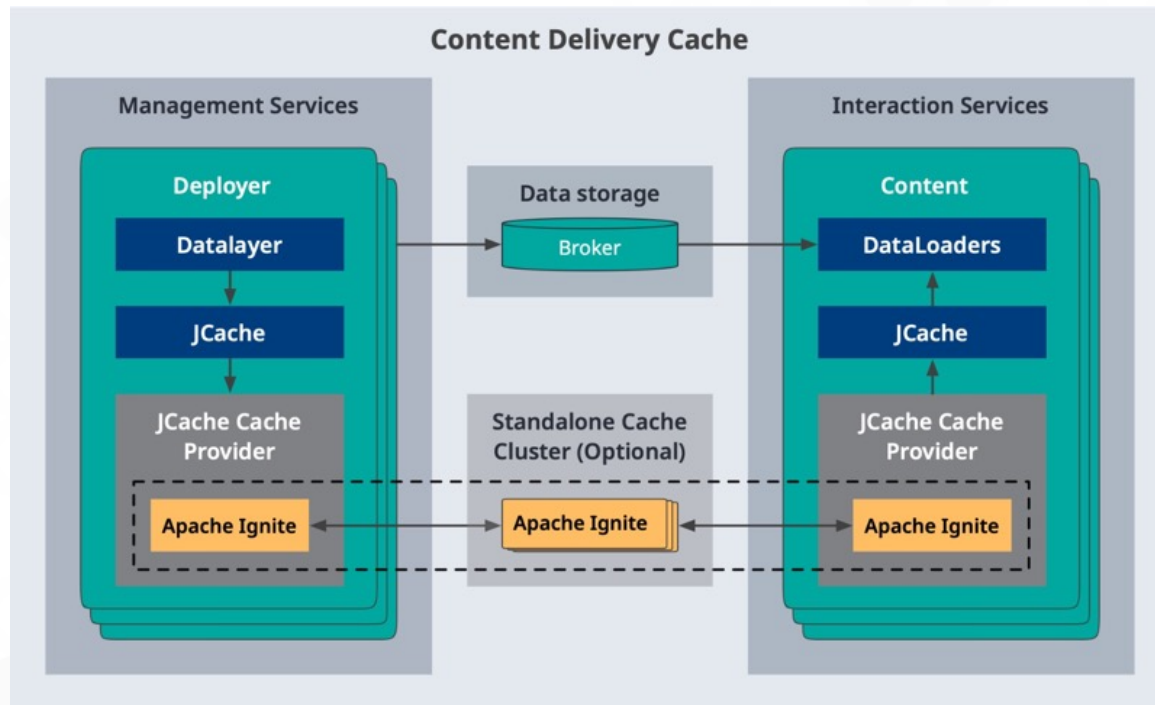

Scaling for successful experiences

Dynamic Experience Delivery (DXD) caching improvements

Users benefit from more flexible scaling opportunities and improved retrieval performance.

New Content Delivery Cache

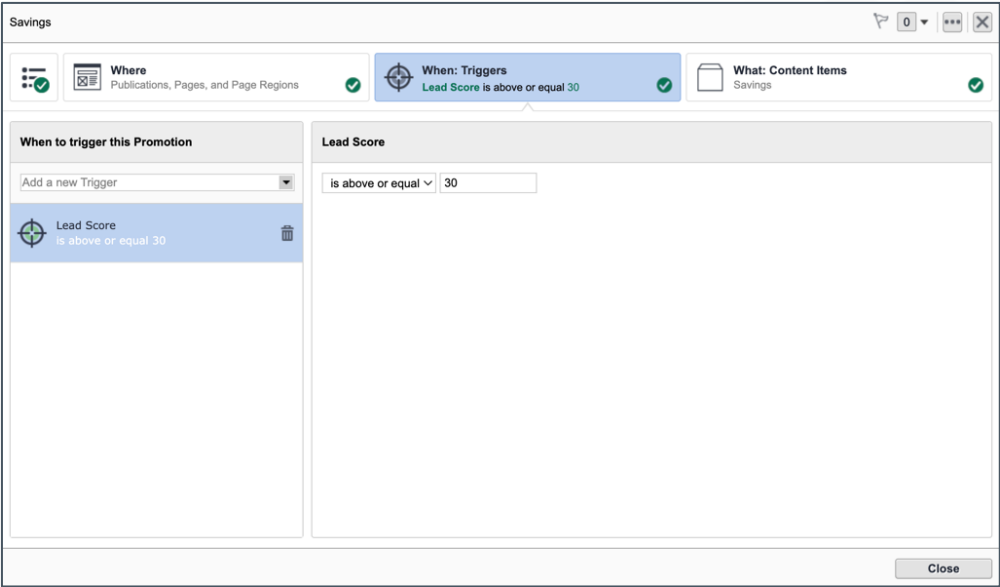

New additions

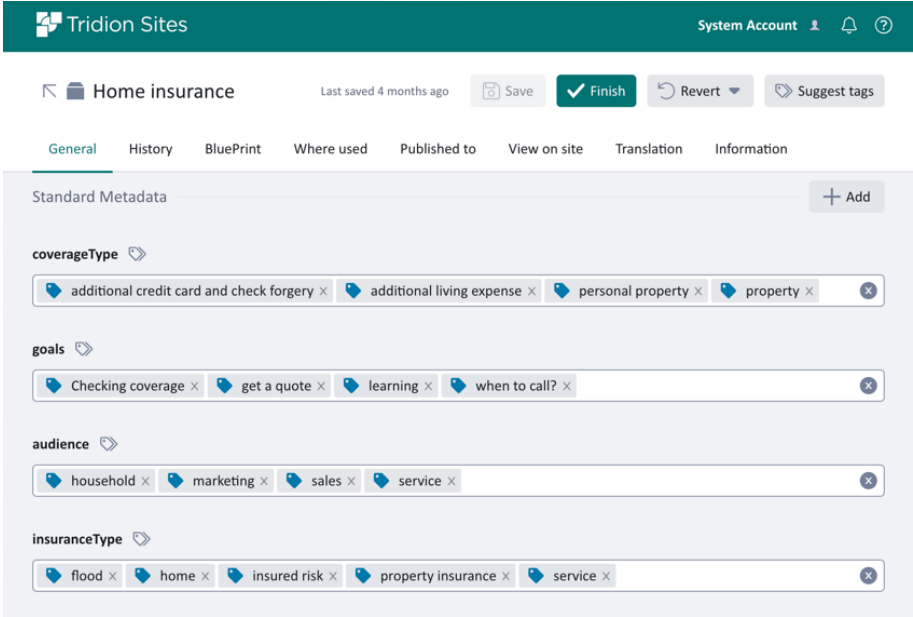

Caching Improvements

- ✓ Delivery caching layer: completely rewritten using Apache Ignite
- ✓ Java standards-based cache provider: it improves retrieval performance
- ✓ More flexible scaling opportunities for users
- ✓ Customers can deploy a distributed cache cluster for high-availability setups

Connecting user journeys

Explicit Personalization Rules
Experience Optimization

Content Knowledge Graph
Semantic AI Recommendations

Customer dissatisfaction from a disconnected journey (why aren't relevant offers linked?)

Infant

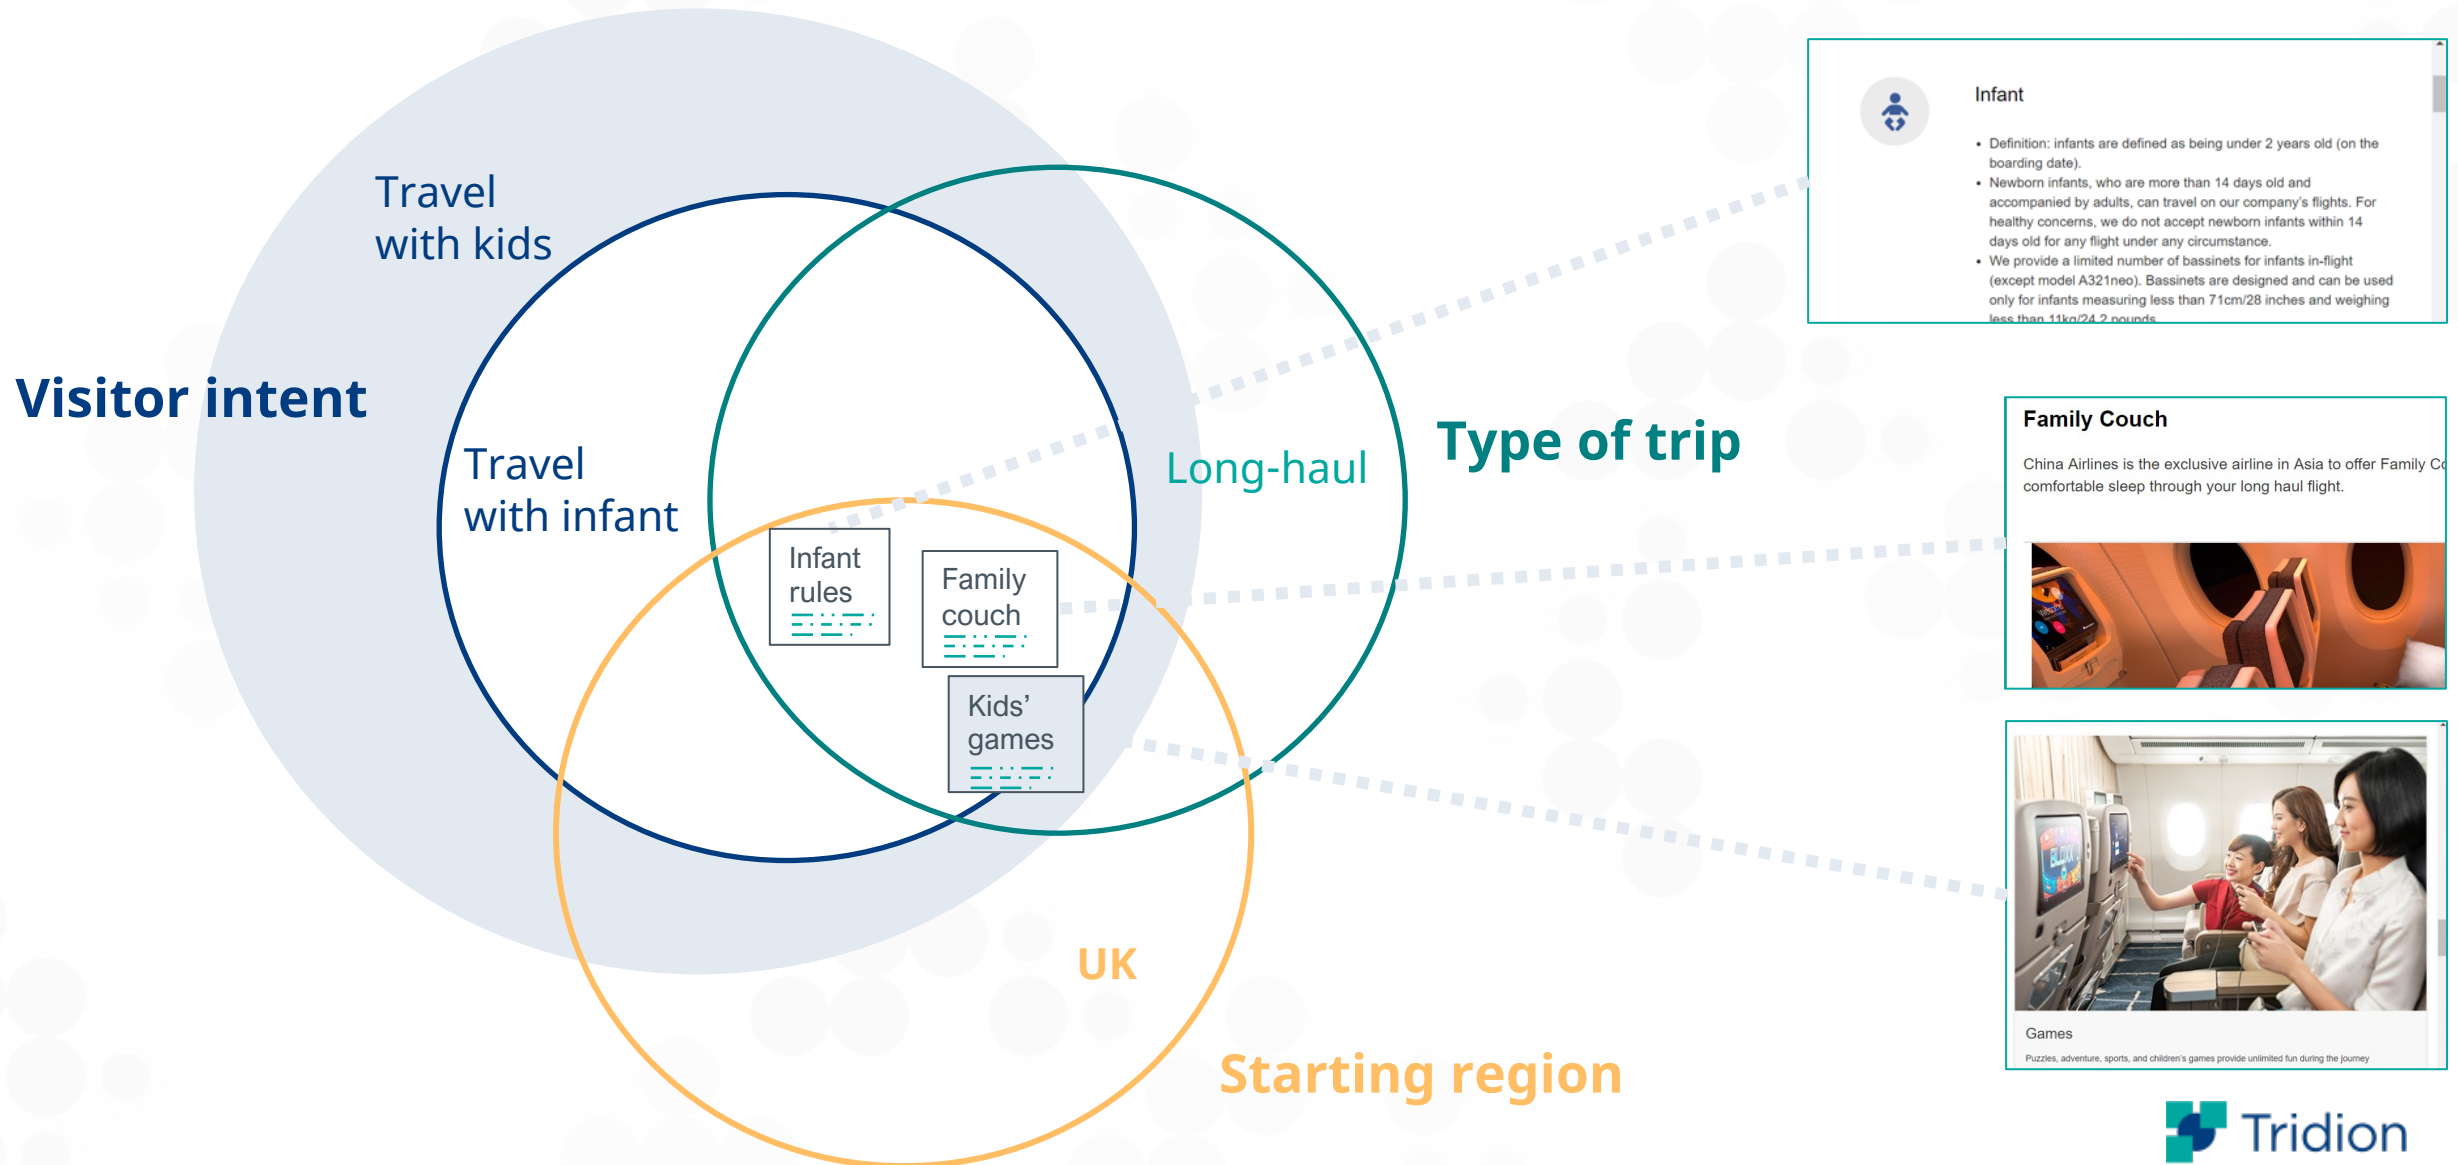

- Definition: infants are defined as being under 2 years old (on the boarding date).
- Newborn infants, who are more than 14 days old and accompanied by adults, can travel on our company's flights. For healthy concerns, we do not accept newborn infants within 14 days old for any flight under any circumstance.
- We provide a limited number of bassinets for infants in-flight (except model A321neo). Bassinets are designed and can be used only for infants measuring less than 71cm/28 inches and weighing less than 11kg/24.2 pounds.
- Passengers travelling with infants have priority to sit in the bulkhead seat that has more space to place the bassinet.
- We encourage you to request for a bassinet when you book an infant ticket, as only a limited number of bassinets and bulkhead seats are available on board and offered on a first-come, first-served basis.
- If an infant travels with an adult and does not occupy a seat, the

Family Couch

China Airlines is the exclusive airline in Asia to offer Family Couch on board our comfortable sleep through your long haul flight.

How a knowledge graph drives recommendations

DXD creates AI-targeted recommendations for users

Powered by Semantic AI (paid option):

Users receive tips / suggestions for the next step in their journey

Taxonomies relate content and generate automatic recommendations

Wrong fuel mistake coverage
24/7 emergency assistance

Next steps

Platform support: Tridion Sites 10

Content Manager

- Windows 10, 11; Windows Server 2019, 2022
- Linux RHEL 8 (latest minor version), 9 (latest minor version)
- .NET Framework 4.8.x
- .NET 6 (Add-on and Access Management service)
- Eclipse Temurin 17.0, Oracle JDK 17.0
- MS SQL Server 2019 and 2022, AWS RDS SQL Server 2019, MS Azure SQL Database
- Oracle 19c

Content Delivery

- Windows Server 2019, 2022
- Linux RHEL 8 (latest minor version), 9 (latest minor version)
- .NET Framework 4.8.x
- .NET Core (Connector Framework)
- Eclipse Temurin 17.0, Oracle JDK 17.0
- MS SQL Server 2019 and 2022, AWS RDS SQL Server and 2019, MS Azure SQL Database
- Oracle 19c
- OpenSearch 2.x

Upgrade paths: Tridion Sites 9.1 and higher

Staged upgrade

Upgrade your content manager first; then perform an upgrade of your content delivery software components, one machine at a time

Benefits

- Minimized business disruption
 - Reduced testing efforts
 - Heavily reduced project risk
 - Reduced total cost of ownership
-
- Tridion Sites 9.1
 - Tridion Sites 9.5
 - Tridion Sites 9.6

Rolling upgrade

Upgrade the database first, and then each product cluster one node at a time

Benefits

- Continuously stay on the latest version
 - Zero downtime for users during upgrade
 - Reduced testing efforts
 - Marginal upgrade project risk
 - Reduced total cost of ownership
-
- Tridion Sites 9.6

Tridion Sites 10 due out in
July; Contact your account
manager to discuss
upgrading!
