

RWS Genuine Intelligence™

INNOVATE LIKE YOU MEAN IT

September 4, 2024

Nobu Hotel, Downtown Palo Alto, CA

Q Innovation Hub

WELCOME

Innovation Workshop

Agenda

1:00 – 1:05

Opening & Introductions

1:05 – 1:20

RWS Genuine Intelligence Research Findings – **Emma Fisher**

1:20 – 1:40

Generative AI – The AWS Perspective – **Andrea Friio**

1:40: – 2:00

Data Spotlight: Content is for Humans; Data is for Machines – **Lou Salmen**

2:00-2:20

Content Spotlight: The RAG Revolution with Structured Content for Trustable AI – **Greg Guttmann**

2:20 – 2:40

Language Spotlight: Evolving Translation – **Andrew Thomas**

2:40 – 3:00

20 mins break

3:00 – 4:15 Workshop

Q Innovation - **Çetin Amirak**

4:15 – 4:30 Closing & Networking

RWS Genuine Intelligence™

**INNOVATE LIKE
YOU MEAN IT**

“Innovation is a
new way of doing
something that
creates more value”

At least, that's how it used to work.

36% of executives see an extreme danger of
enterprise resources – that could be better
deployed elsewhere – **being diverted toward
Gen AI.**

87%

Of executives admit to feeling pressure to implement Gen AI solutions at speed

68%

But 68% find it challenging to identify REAL innovators into today's noisy AI Market

Today's AI market has
“gone a bit crypto”

50%

Say they are already seeing Gen AI applications that will seriously disrupt their industry's future

65%

Of executives see a real risk of an AI backlash in the coming years as a result of the current hype

Trustable content?

53%

Are concerned by the accuracy and reliability of Gen AI outputs
(with 26% concerned by impact on CX)

Build or Partner?

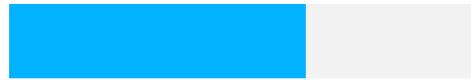

20%

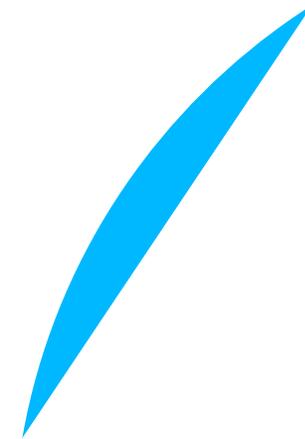

Prefer to build Gen AI solutions in-house

VS

60%

Report that their organization prefers to work with trusted partners to develop Gen AI solutions

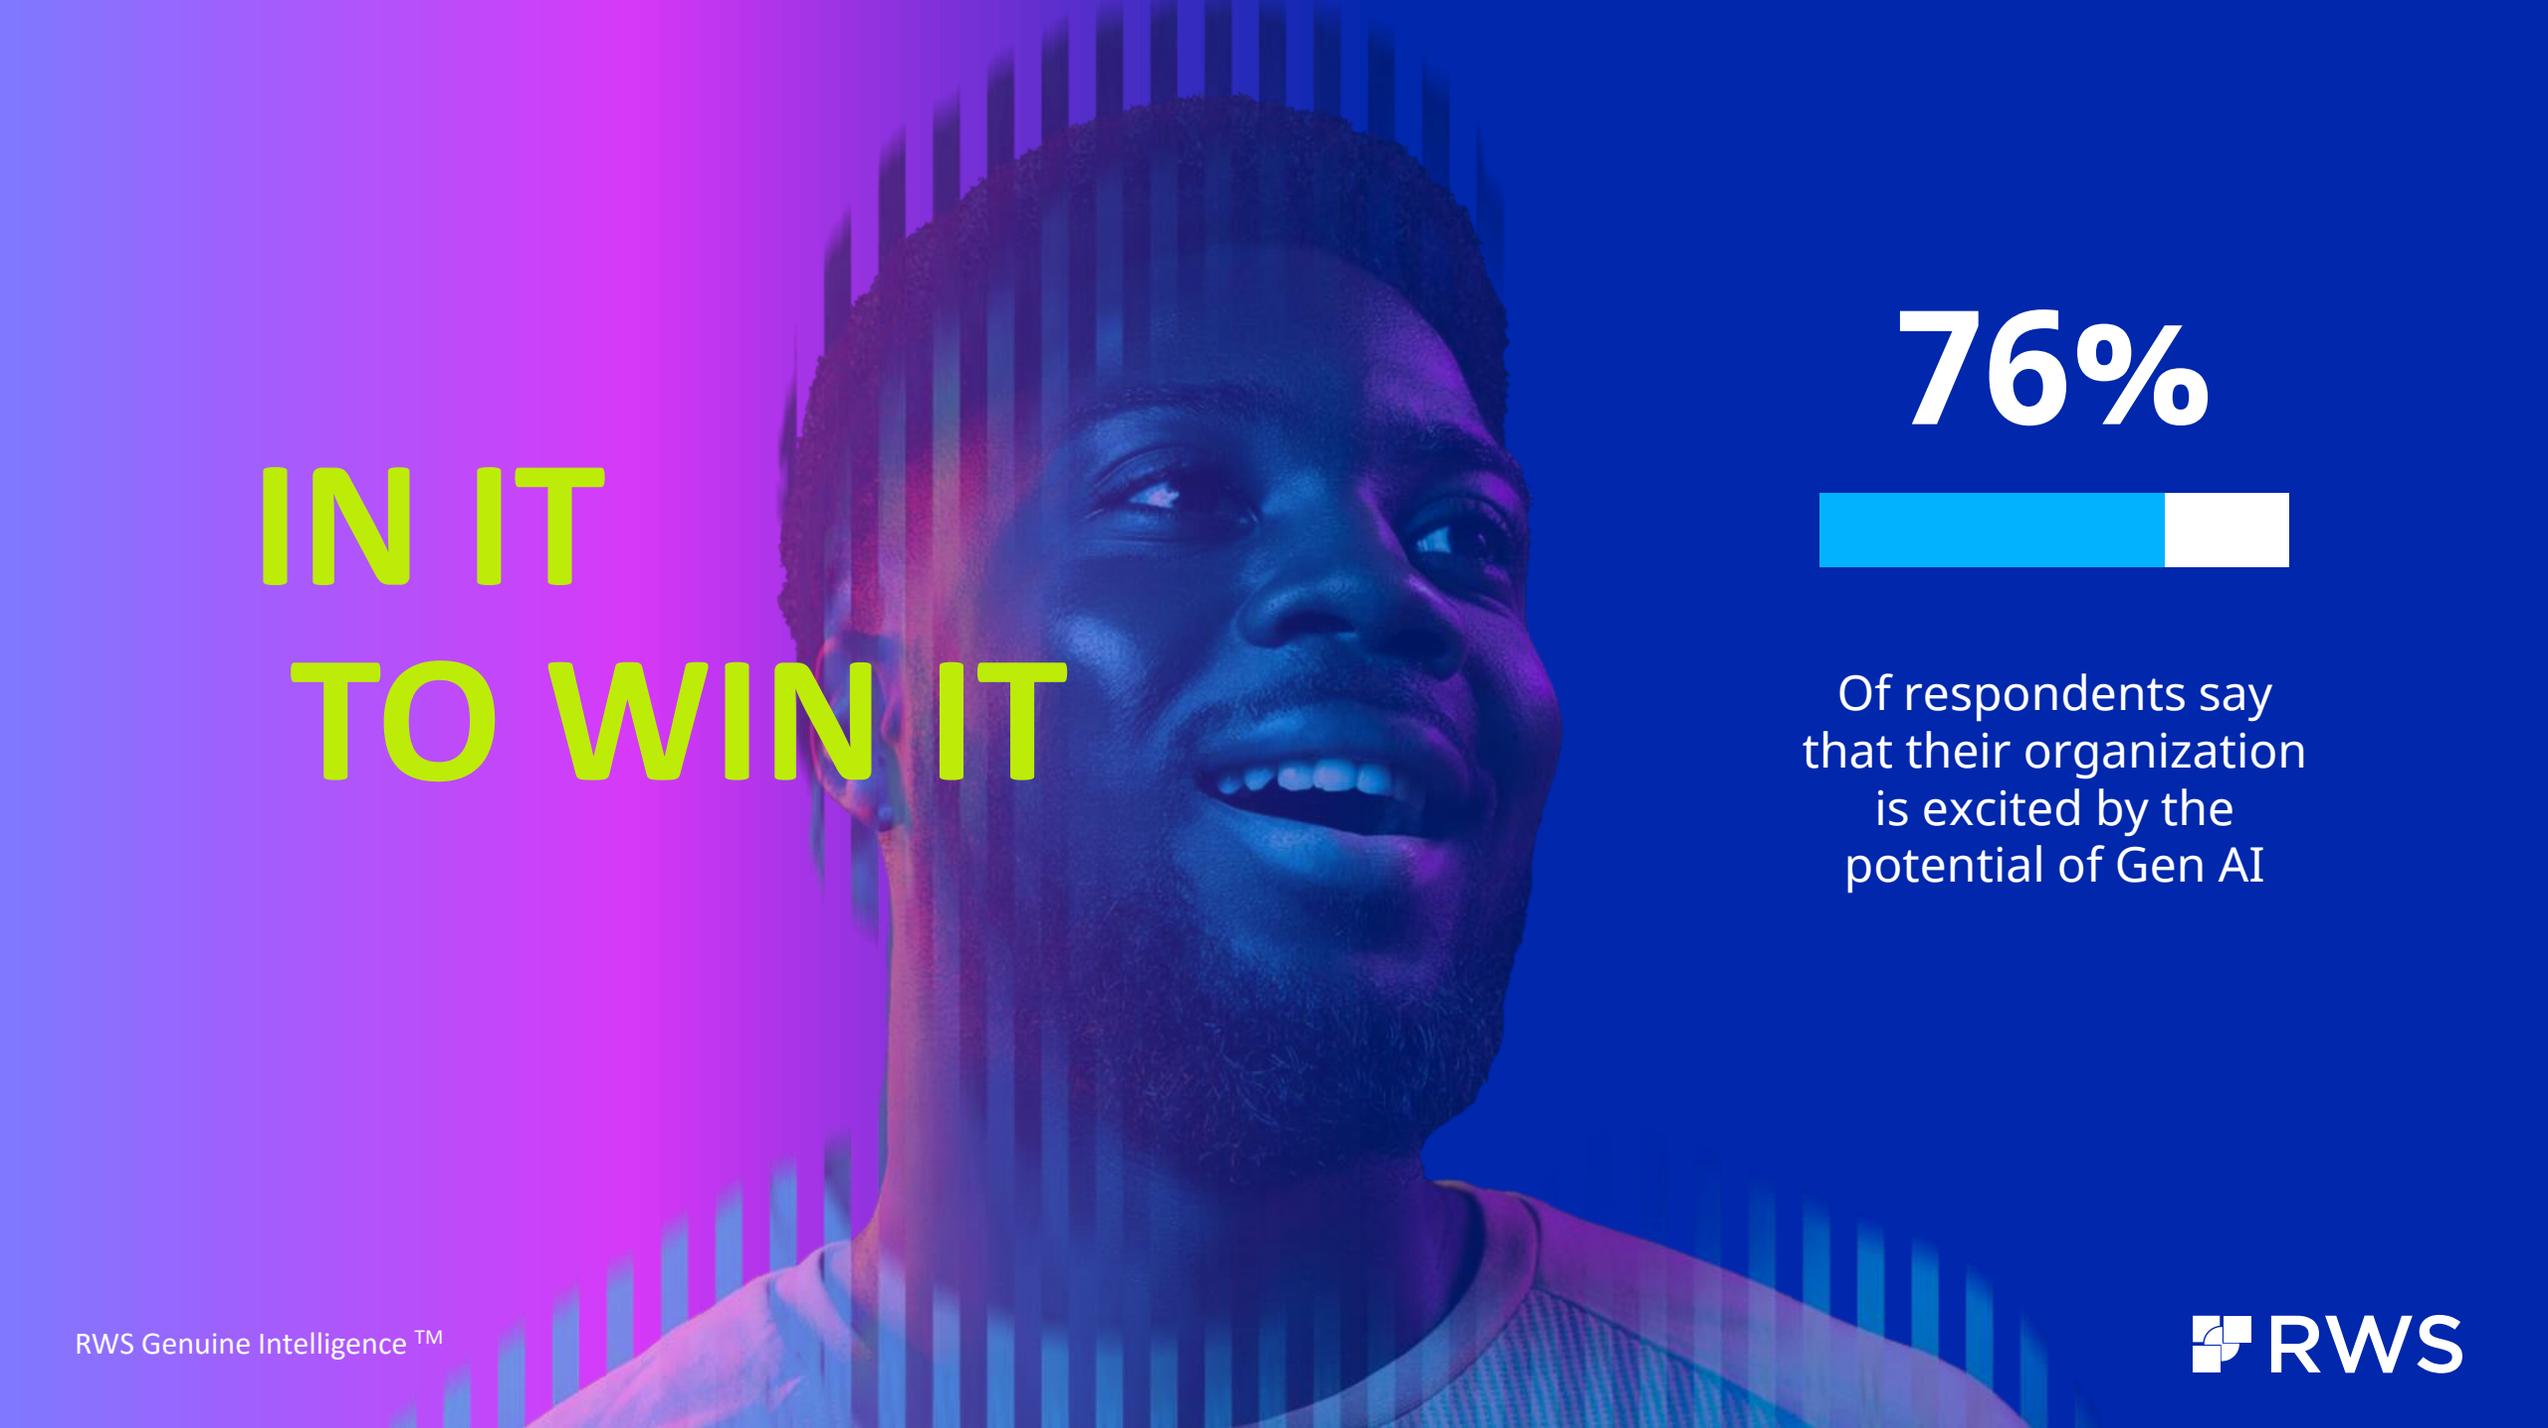

Innovation:
**MAGIC
OR METHOD?**

Real innovation
must be purposeful.

IN IT
TO WIN IT

76%

Of respondents say
that their organization
is excited by the
potential of Gen AI

THE
LOOK BEFORE
YOU LEAP
CHALLENGE

81%

Are more interested
in *exciting customers with
new (AI) solutions*

Top risks that US executives
associate with Gen AI today

to innovate

Generative AI - The AWS Prospective

Andrea Friio – Principal Solution Architect @ AWS

Generative AI is likely to be **the most disruptive innovation yet encountered in the digital workplace.**

We expect it to impact **80%** of jobs to some extent, with information worker jobs changing the most quickly and dramatically.”

Gartner, Four Generative AI Use Cases for the Digital Workplace 2023

© 2024, Amazon Web Services, Inc. or its affiliates. All rights reserved.

GenAI-supported work tends to be more efficient and of higher quality than work produced by unsupported human workers.

Productivity is improved by over **30%**, on average.”

Gartner, Four GenAI Use Cases for the Digital Workplace, 10 October 2023

Generative AI's impact in the workplace

Productivity

Employees spend between **1.7 and 2.8 hours a day** in repetitive tasks.

These tasks can be greatly **reduced by a factor ranging from 2 to 28** with generative AI tools.

[American Productivity and Quality Center](#)

Creativity

The Wharton Business School conducted an experiment comparing product ideas generated by MBA students alone versus MBA students working with generative AI.

The human-AI team created **200 product ideas in just 15 minutes, 40 times more than the human-only team.**

[Wharton Business School](#)

Quality

A survey conducted by the MIT Technology Review found that **88%** of the respondents said that generative AI is not only helping them to **do more work**, but helping create **higher quality work**.

[MIT Technology Review](#)

2023 The Year of POCs

What is generative AI?

Is this secure?

Do I need to become a prompt engineer?

How do I choose a model?

Where do I get started?

What does this mean for my business?

What is a Foundation Model?

Which models should we try out?

What is FM?

What is a Large Language Model?

2024

The Year of Production

(FOR SOME)

How do I prioritize my projects?

How can I lower my costs?

How do I make this real?

What customization method should I use?

How I can I scale this?

Which models should I use?

Should I train my own model?

How do I manage risks?

How can we move faster?

Innovation opportunities

Generative AI has potential to create significant business value

NEW EXPERIENCES

Create new innovative and engaging ways of interacting with your customers and employees

PRODUCTIVITY

Radically improve productivity across all lines of business

INSIGHTS

Extract insights and clear answers from all your corporate information, enabling faster and better decisions

CREATIVITY

Create new content and ideas, including conversations, stories, images, videos, and music

Generative AI use cases across industries

ENHANCE CUSTOMER EXPERIENCES

BOOST EMPLOYEE PRODUCTIVITY &

TOYOTA

Toyota accelerates digital transformation with Amazon Q, boosting efficiency by 25%

CHALLENGE

Toyota wanted to find new ways to support safety. To help educate and prepare customers by providing information on the vehicle itself, Toyota looked to generative AI.

SOLUTION

Toyota converted vehicles owner's manuals into a digital format and then built a virtual assistant. The assistant can answer questions from owners on the vehicle functionality, making Toyota vehicles experts on themselves. [Learn more.](#)

OUTCOMES

- Customers can ask the vehicle questions about icons or functionality of automobile
- Vehicles can monitor their own health and report problems to the owners or suggest maintenance

MOVE QUICKLY AND GENERATE VALUE

BMW

PREMIUM CUSTOMER EXPERIENCE

BMW deploys premium experiences at scale with AWS generative AI, processing 12 billion requests a day for 27 million vehicles

CHALLENGE

BMW needed to securely deliver high-quality connected mobility solutions to motorists around the world.

SOLUTION

BMW developed an In-Console Cloud Assistant (ICCA) solution in with Amazon Bedrock. Part of the company's infrastructure optimization program, the ICCA is empowering BMW Group DevOps with generative AI to boost performance and efficiency to deliver premium driving experience, while keeping data secure in transit and at rest. [Learn more.](#)

OUTCOMES

- Solution processes 12 billion requests a day for 27 million vehicles
- Handles over 110 terabyte traffic a day

DATA INTEGRATION

Your data is the **differentiator**

Generic
generative AI

Generative AI that
knows your business
and your customers

Make generative AI work with **your data**

RETRIEVAL-AUGMENTED GENERATION (RAG)

Specialized knowledge through prompt augmentation

Enterprise knowledge corpus

No change to the foundation model

FINE-TUNING

Specialized knowledge for specific tasks

Small number of labeled examples

Change a copy of the foundation model

CONTINUED PRE-TRAINING

Generalized and specialized knowledge for your domain

Unlabeled, unstructured enterprise data

Change a copy of the foundation model

Key Considerations: Generative AI with AWS

Move quickly

Customize

Scale

Move quickly and generate value

- **Identify use cases** that are relevant, viable, and impactful
- **Your data is the key** to maximizing the potential of generative AI
- Empower your entire workforce, **regardless of their AI expertise**

Customize generative AI for your business

- **Customization is key** to delivering differentiated experiences
- From models to tools, **choice** enables long-term more flexibility and agility
- **Security and privacy** must be built in from day one
- Ensure your data is **readily accessible *and* ready for AI**

Make the leap from **experiments to scale**

- Measure and track the **business value and ROI** as you scale
- Optimize for your **cost, latency, and accuracy** needs
- **Manage risk, maintain trust, and build responsibly** with strong compliance & governance
- Use services designed for to enable innovation, and **designed to scale**

Security considerations for generative AI

COMPLIANCE & GOVERNANCE

The policies, procedures, and reporting needed to empower the business while minimizing risk

Create generative AI usage guidelines

Establish process for output validation

Develop monitoring & reporting processes

LEGAL & PRIVACY

The specific regulatory, legal, and privacy requirements for using or creating generative AI solutions.

Retain control of your data

Encrypt data in transit and at rest

Support regulatory standards

CONTROLS

The implementation of security controls that are used to mitigate risk.

Human-in-the-loop

Explainability & auditability

Testing strategy

Identity and access management

RISK MANAGEMENT

Identification of potential threats to generative AI solutions and recommended mitigations.

Threat modeling

Third-party risk assessments

Ownership of data, including prompts and responses

RESILIENCE

How to architect generative AI solutions to maintain availability and meet business SLAs.

Data management strategy

Availability

High Availability and Disaster Recovery strategy

Responsible AI: Best practices

Put your people first

Assess risk on a (use) case-by-case basis

Iterate across the AI lifecycle

Selecting the right use cases

Strategic recommendations on generative AI

EYES WIDE OPEN

- Culture of continuous experimentation
- Prevent early dependencies

NO ONE SIZE FITS ALL

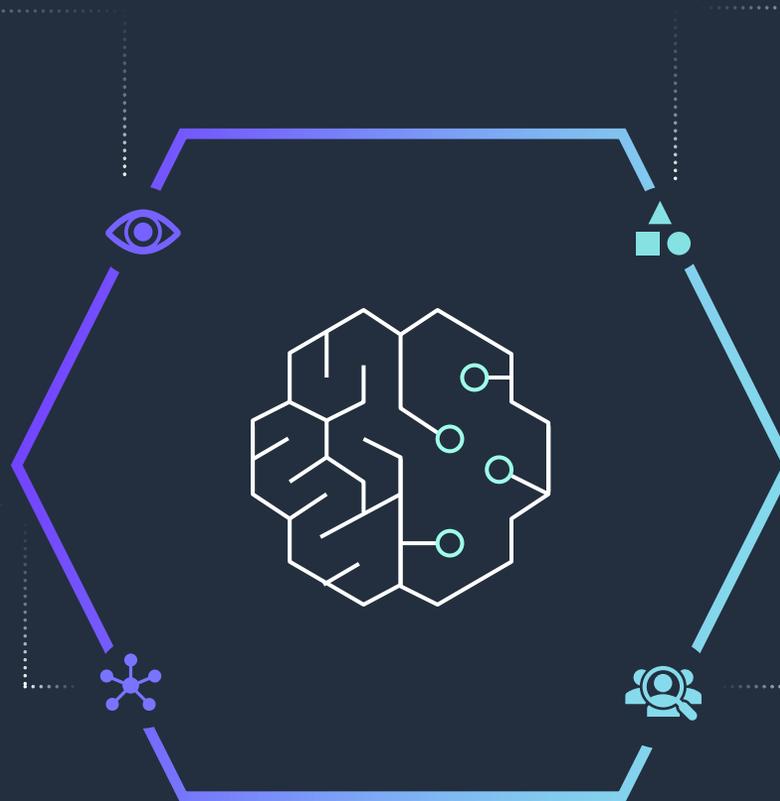

- Generative AI as an enhancement – not a replacement.
- Requirements in enterprises differ based on financial resources, security needs, governance and skills.
- Evaluate buy-vs-build

FLEXIBILITY IS KEY

- Innovation requires flexibility free from technical or contractual lock-ins.
- Infrastructure supporting 3rd-party Generative AI integration
- A breadth of services ensures long-term flexibility and business value

LISTEN AND ENABLE

- Work backward from your customers
- Listen to your domain experts
- Enable employees with the right set of tooling

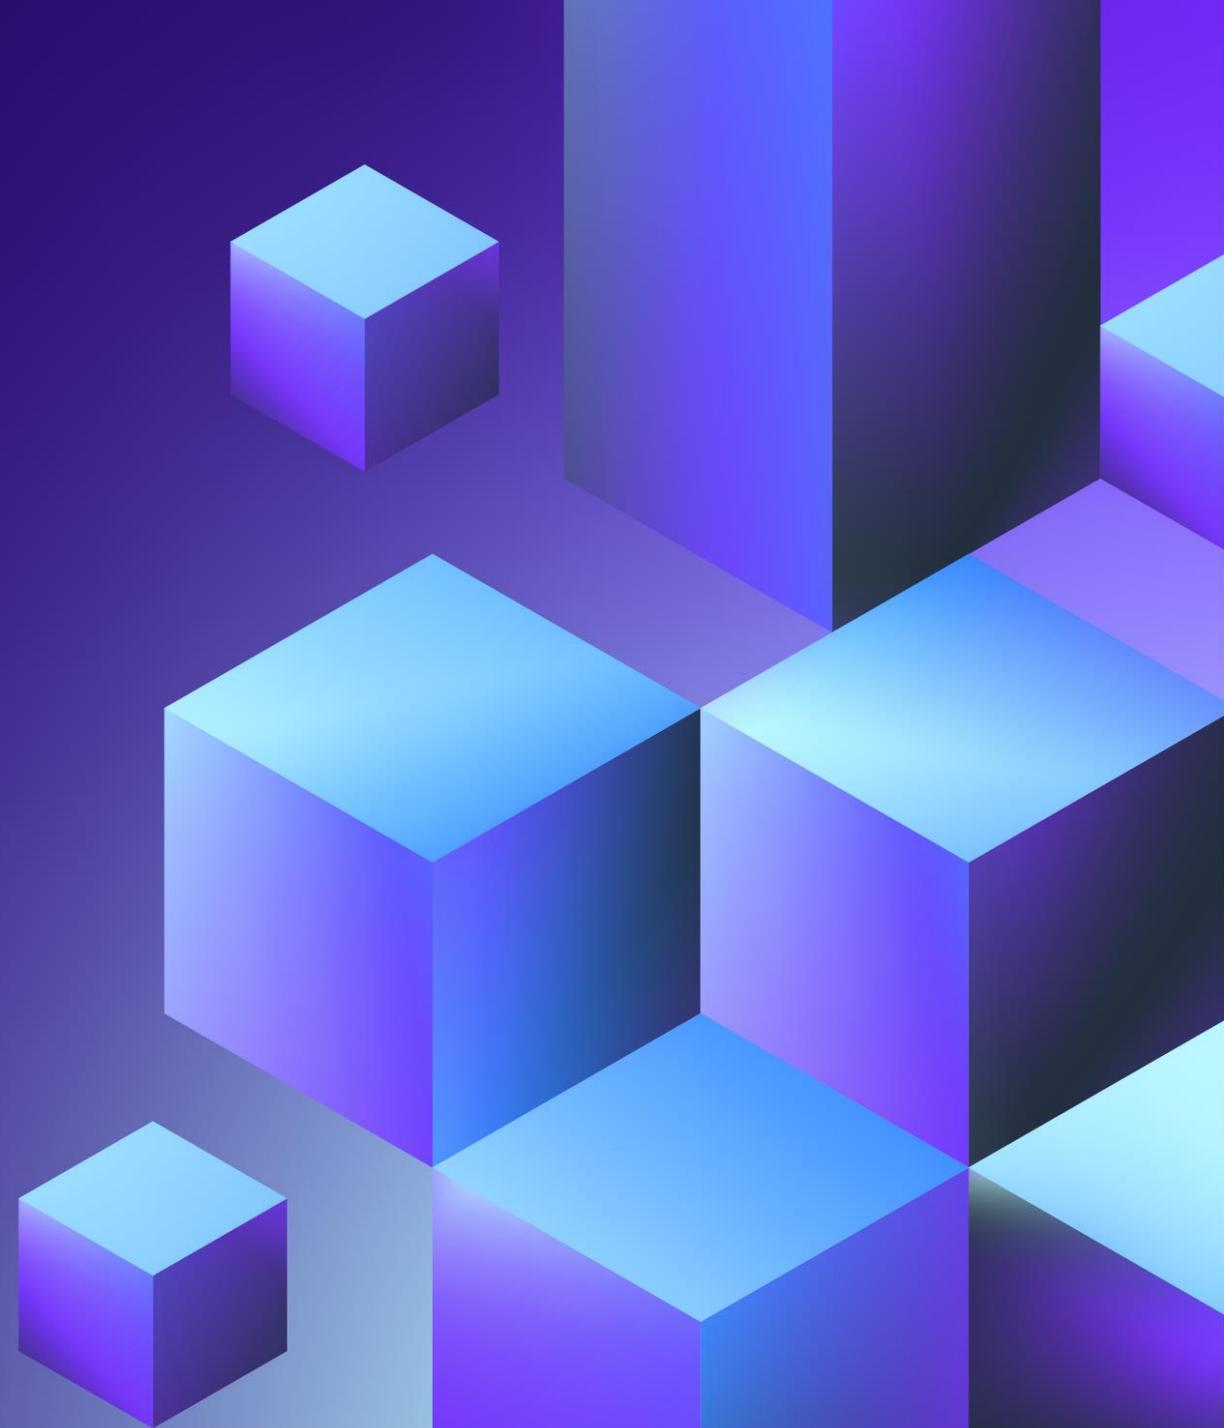

Thank you!

Andrea Friio

**CONTENT IS
FOR HUMANS**

**DATA IS
FOR MACHINES**

Content is data; data is NOT content

Localizing content and annotating data are separate processes and workflows, with different objectives

What happens when AI is multilingual?
• Is content/data localized or annotated?

Multilingual content vs. multilingual data

Multilingual content

Bilingual

Source to target

For humans

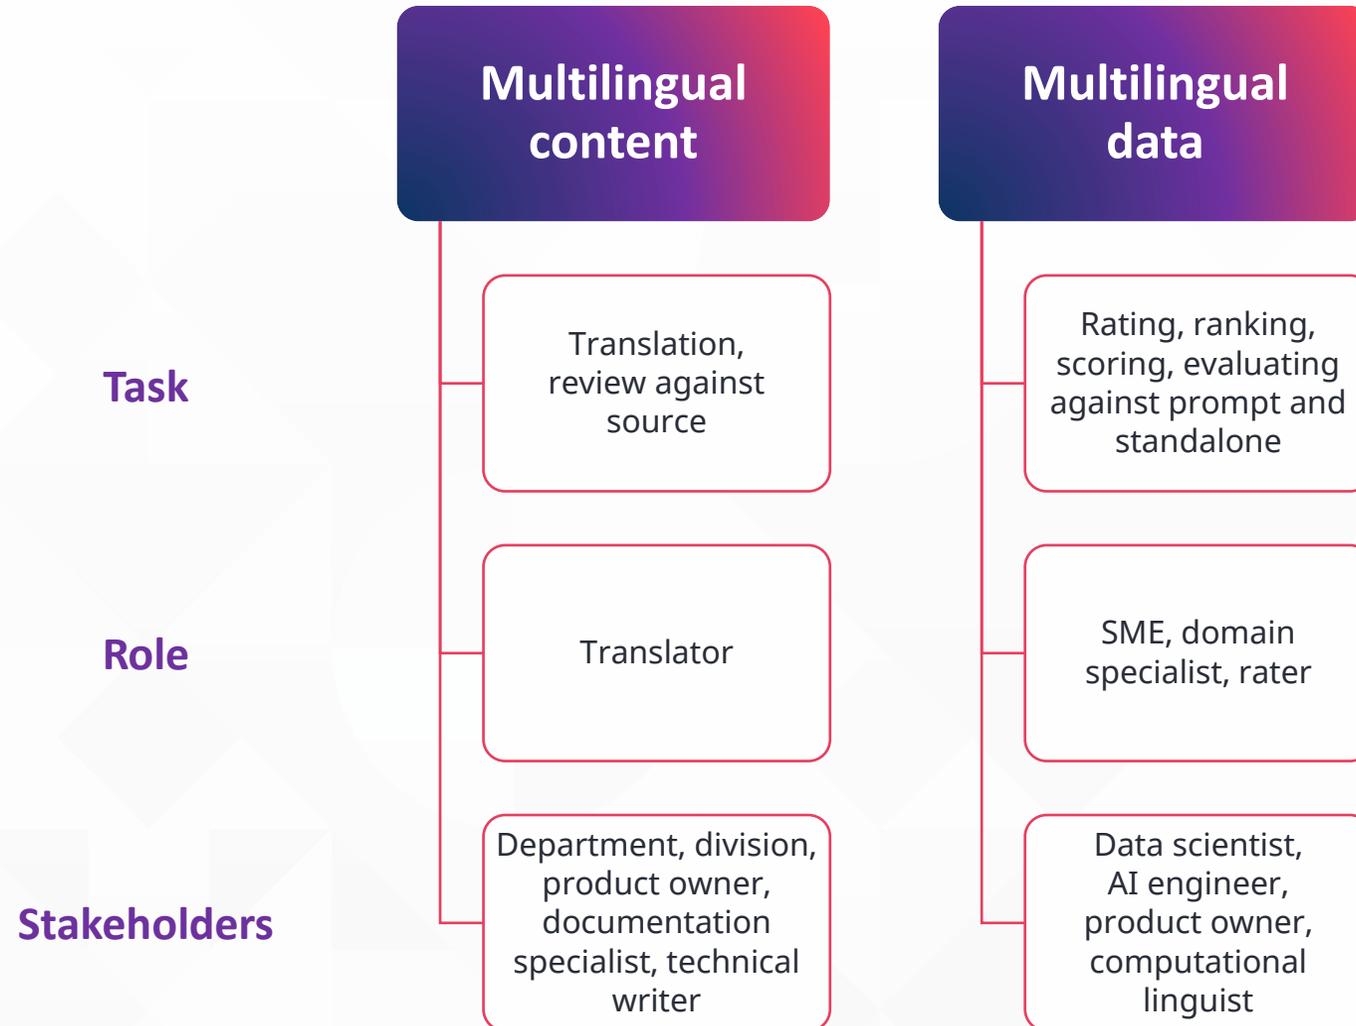

Multilingual data

Monolingual

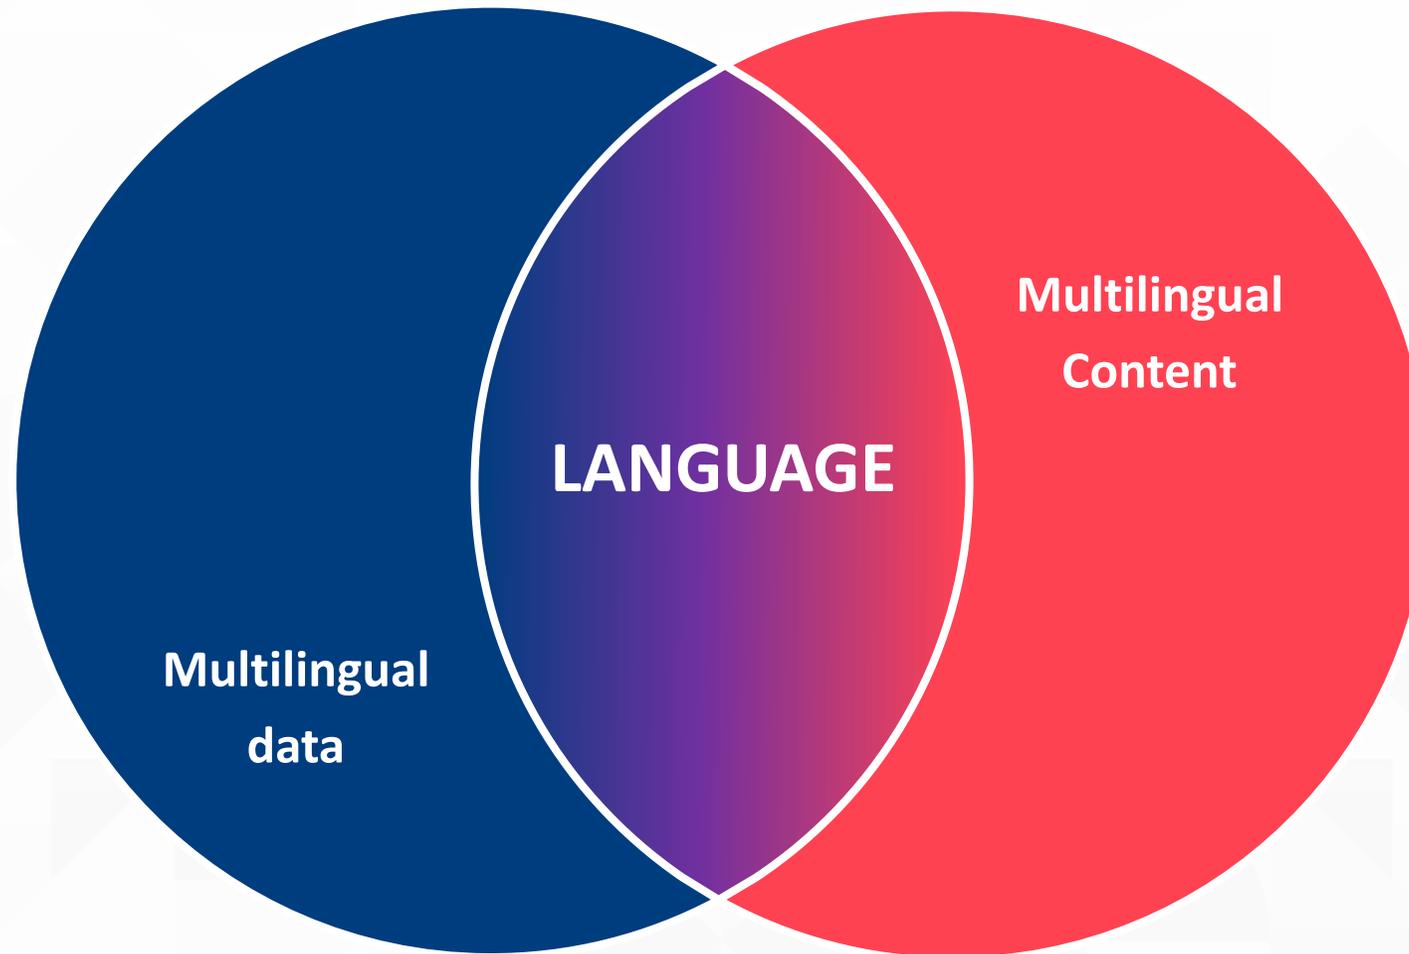

Prompt to response

For machines

How do they differ?

What do multilingual data and multilingual content have in common?

This presents a HUGE opportunity for localization teams

Evolve into
language experts,
not localization
specialists

Fight for anything
language related,
especially
multilingual
AI data

Learn to understand
the differences in
how multilingual data
should be handled vs.
multilingual content

What steps can I take if Tridion Docs search is not returning relevant results for my technical documentation?

Trustable Chat

Retrieval Augmented Generation

Links back to source

◆ If you're not getting relevant results in Tridion Docs search, review your search query and make it more specific. Check for proper tagging and metadata in your documentation to enhance search accuracy. Ensure that your search query aligns with the terminology used in your documentation. (1)

Show references

⊖ How can I troubleshoot slow search performance in Tridion Docs?

◆ Slow search in Tridion Docs may be due to indexing delays or server issues. Verify the indexing status and consider optimizing your search queries for efficiency. Ensure that your Tridion Docs server has adequate resources, and check for any ongoing maintenance or updates. (1)

Show references

⊖ What should I do if Tridion Docs search results are displaying outdated information?

◆ To address outdated information in Tridion Docs search, consider updating and republishing your documentation. Ensure that timestamps and versioning are accurate. If the problem persists, investigate if there are any synchronization issues between your content management system and the search index (1)

Solution Idea Name:		
Target user roles <small>Who will use this solution? What is their role and in which department do they work?</small>	User's objectives <small>What should the target users be able to accomplish with the solution?</small>	Relevance indicators <small>Reach: How many potential users does this solution have?</small> <small>Strategic Relevance: How important is this solution to achieve the organisation's targets?</small> <small>Business Value: How would you rate the business impact of your solution idea?</small>
Challenges / Optimizations <small>What challenges are being addressed? What does the solution improve?</small>	Business Benefit <small>What makes this a valuable solution for the company? What KPIs are improved?</small>	
Process Steps <small>How does the process look and where could the solution help?</small>		

Thank you!

RWS Holdings plc is a unique, world-leading provider of technology-enabled language, content and intellectual property services. Through content transformation and multilingual data analysis, our combination of AI-enabled technology and human expertise helps our clients to grow by ensuring they are understood anywhere, in any language.

Our purpose is unlocking global understanding. By combining cultural understanding, client understanding and technical understanding, our services and technology assist our clients to acquire and retain customers, deliver engaging user experiences, maintain compliance and gain actionable insights into their data and content.

Over the past 20 years we've been evolving our own AI solutions as well as helping clients to explore, build and use multilingual AI applications. With 45+ AI-related patents and more than 100 peer-reviewed papers, we have the experience and expertise to support clients on their AI journey.

We work with over 80% of the world's top 100 brands, more than three-quarters of Fortune's 20 'Most Admired Companies' and almost all of the top pharmaceutical companies, investment banks, law firms and patent filers. Our client base spans Europe, Asia Pacific, Africa and North and South America. Our 65+ global locations across five continents service clients in the automotive, chemical, financial, legal, medical, pharmaceutical, technology and telecommunications sectors.

Founded in 1958, RWS is headquartered in the UK and publicly listed on AIM, the London Stock Exchange regulated market (RWS.L).
